

Effective for dates of service on and after October 1, 2011

Medicaid will require providers to obtain authorization on certain advanced imaging procedures. Medicaid and Qualis Health have contracted to provide web-based access for utilization review and prior authorization (PA) for outpatient advanced imaging services. OneHealthPort will provide secure access and logon. OneHealthPort is an online portal that provides single sign on, secure access to a number of health plan web portals.

Qualis Health's outpatient advanced imaging webpage is available to register for secure access. For more information about this process, see the Healthcare Professionals section online at: <http://www.qualishealth.org/healthcare-professionals/washington-medicaid/provider-resources>.

While you may be registered with Qualis Health to submit requests for Washington Labor and Industries, you must also register with Qualis Health to submit imaging requests for Washington Medicaid clients.
